

STILL USING WATER FREELY?

SEE WHAT THE MUNICIPALITY WILL DO...

**PREVENT
DROUGHT
DISASTER**

Our supply dams stand at less than 24% – and the water levels are still dropping.

As part of its water-saving measures, the Municipality is currently installing flow meter restrictors for high-consumption households consistently using more than 30 kilolitres of water per month.

These meters allow a water supply to each household from 5am every day until the daily limit of 1 000 litres per household is reached. The meter then automatically turns off the water supply until 5am the next morning.

Please monitor your water consumption and avoid having your water restricted!

Note: Tampering with the flow meter restrictor is a criminal offence. You will be prosecuted.

For more information, call 0800 20 50 50.
