SPECIFICATIONS

- Temperature and humidity SANAS Calibration of Testo Saveris data loggers.
- Certification must be provided for all temperature and humidity calibrations upon request.
- The service provider must be able to maintain stock levels of all consumables and replacement parts within South Africa.
- Calibrations can be done on-site or off site. The unit prices must be inclusive of all cost.
- On site testing and report on Logger's operation.
- Calibration must be a minimum of 2 Point (below & above) calibration per channel, covering the ranges stipulated on the attached tables.
- Temperature adjustments can be done where necessary.
- The data loggers must operate on its software and must be validated.
- The unit must be able to connect to a PC via USB for configuration, after which it may be disconnected from the PC for stand-alone operation.
- Must have an alert / alarm system to report whenever an error condition is detected e.g., power failures, out of limit values.
- Capability for data received from the logger to be stored in a database which can be viewed via the air drive website.
- Must allow remote configuration, current status view, event logging, and periodic status logging.
- The service provider must be able to respond to any repair / service complaint within 48 hours of the complaint being lodged and to carry out the necessary services and/or repair or replace any faulty parts within a two-week period from notification of complaint.

- The supplier / technician must ensure that the data loggers produce valid results before handing over to the users.
- If the scope of the accredited laboratory meets some of the data loggers and does not meet others, the supplier will be disqualified as this tender is only for one service provider with the ability to do all ranges of the temperatures and humidity.

CERTIFICATION

The certificate to be issued should contain the following:

- Title, address and contact list of the service provider
- The date of the calibration
- The date of the issue of the report
- The results with, where appropriate, procedure, traceability, correction errors, equipment, uncertainty of measurement and validity
- The results for calibration should include the linearity results with readings for before and after adjustment.
- The service provider must reflect SANAS registration number on the calibration certificate.
- The certificate must show clearly the Metrologist that was performing the calibration and the technical signatory who checked the calibration.
- Payment will be made when everything works according to the specification requirements.
